

FOR IMMEDIATE RELEASE

**ENIGMA CEO TO SPEAK AT AIRLINE AND AEROSPACE
OPERATIONS AND MRO IT CONFERENCE**

Presentation to address “IT Considerations in a Modern MRO Facility”

BURLINGTON, Mass.---March 22, 2010--- Jonathan Yaron, president and CEO of Enigma Inc., the leading software company for aftermarket service and parts, will be speaking on the topic of “IT Considerations in a Modern MRO Facility: Will Paperless Become a Reality?” at the Airline and Aerospace Operations and MRO IT Conference Americas on March 23, 2010 at the Hilton Miami Downtown Hotel. The conference will address the key issues relating to the development of IT and its application in maintenance and aircraft flight operations.

Yaron will discuss how information technology plays an increasingly important role in a modern MRO facility; new applications have radically improved the process of integrating supply chain and engineering content with maintenance planning and ERP systems. His presentation will discuss some of the obstacles, as well as the inherent opportunities, for airline operators and MRO shops to become much more efficient and profitable by embracing new IT solutions.

Enigma will also exhibit at the conference, in booth #E13, to demonstrate the Enigma InService MRO, Job Card Generator and Revision Manager solutions for aircraft maintenance. These solutions allow maintenance planners, technicians and engineers to improve maintenance speed and accuracy and to control the distribution of new and modified service information, including: parts, manuals, bulletins, job cards, revisions, engineering orders and more.

Enigma has helped airlines like Japan Airlines and KLM Royal Dutch Airlines to decrease maintenance costs, increase equipment uptime and improve maintenance efficiency and consistency.

Quote attributable to Jonathan Yaron, president and CEO of Enigma Inc.:

“Automated revision management, job card generation and digital signatures are just a few of today’s IT offerings that can reduce maintenance time and support costs. However, inconsistent documentation standards, mixed fleets and regulatory concerns have prevented the industry from embracing many of these technologies. I am pleased to have this opportunity to speak with the leading airlines and MRO providers in this region.

Enigma's aircraft maintenance solutions continue to help numerous airlines and aviation shops realize substantial efficiency gains to drive business growth, and there is a great need for our technology."

About Enigma

Enigma is the only software company delivering a product suite that improves the efficiency, consistency and profitability of maintenance, repair and overhaul (MRO) operations and aftermarket sales and service organizations. Enigma's unique products integrate with product lifecycle management, supply chain management, enterprise resource planning and other enterprise applications to provide a dynamic encyclopedia of service, parts and diagnostic information that captures technicians' expertise and manages an optimal service and support workflow. By facilitating aftermarket maintenance, parts logistics and equipment uptime, Enigma helps service and support organizations maximize their profitability.
